

A two-story stone house with a grey gabled roof. The front features a bay window with white frames and a small white dome on top. To the left, a patio with a grey umbrella and two black chairs is visible. The garden is landscaped with various plants and a stone retaining wall with steps.

the  orangery
the integra

the  orangery
the integra

A classic and sturdy brick built orangery, the Integra design is supported inside the cavity wall.

The system features a "warm roof" construction that meets the latest building standards regulations. High strength aluminium replaces traditional timber, and the wide aluminium gutter replaces traditional flat roof membranes.

The strength of the construction means that the gutter can be safely walked on for maintenance purposes.

Internally you have a deep plasterboard soffit for that unique orangery look, also allowing you to integrate downlights and speakers.

features...

- Fully insulated warm roof construction (125mm insulation) to perimeter gutter
- 400mm integrated aluminium powder coated gutter
- Fully sealed gutter outlets, full range of decorative aluminium hoppers and downpipes
- Deep (628mm (D) x 435/485mm (H)) internal plasterboard soffit
- Structural aluminium framework - no timber

benefits...

- Full one stop solution for brick perimeter orangery roofs
- No problem walking on gutters for maintenance
- Roof specific
- Easy to fit kit, no cutting or drilling of aluminium sections
